

FLOODED WITH LIGHT

weinor all-glass elements

GLASS SYSTEMS by weinor – transparent, suitable for retrofitting, multifunctional

weinor is the recognised specialist for elegant all-glass sliding or folding elements. These provide outstanding protection from weather and at the same time allow smooth transitions from inside to outside.

All glass easy-glide sliding door w17-c

Thanks to its premium-quality fittings, weinor's easy-glide all glass sliding door is a breeze to operate and also locks if required. The easy-glide all glass sliding door feels equally at home as a wind and weather protection feature for patios, balconies and pavilions, or even as a room divider. This all-glass system can be retrofitted to numerous types of roof and offers maximum transparency as there are no vertical frames.

User-friendly slide-and-turn partition w26-c

The convenient sliding wall w26-c from weinor is the elegant wind and weather protection solution for light-flooded balconies and loggias. With its all-glass construction, it offers maximum transparency without troublesome vertical frame sections. It is easy to slide and turn away into the sideways parking position. This saves space and ensures that the panes are easily accessible from inside for cleaning purposes – two "must haves" for use on balconies and loggias. Given adequate structural stability, also for retrofitting on existing patio roofs.

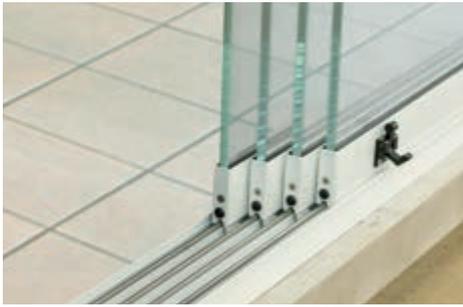

Easily operated

It doesn't get any easier than this: thanks to its premium-quality fittings, weinor's easy-glide sliding door is a breeze to operate and also locks if required.

ALL GLASS EASY-GLIDE SLIDING DOOR w17-c

Highlights and versions

Easy to open – convenient and user-friendly

Your all-glass elements should be moved quickly and effortlessly? The easy-glide all glass sliding door is extremely easy to operate and sliding the panels is a breeze.

- very user-friendly all-glass elements
- exceptionally smooth operation
- foot-operated lock on the inside – no need to bend over

Close entire sides by only sliding primary door

The intelligent actuator function enables very and convenient operation of the your glass side elements.

- slide multiple panels in one go
- close entire fronts with a flick of the wrist

Locking options – giving you peace of mind

Your garden room should not be open to everyone. Guard against unwelcome guests with a high-quality circle lock bar.

- lockable from the inside with profile cylinder with keys
- double-sided locking option also available

Retrofittable – for virtually every patio roof

The all glass sliding door fits under almost every patio roof – whether this is made of wood, aluminium or plastic. As this is a so-called standing system, your roof structure will be barely subjected to load. All forces are transferred to the bottom.

- low costs – no reinforcement of your roof is required
- well thought-out attachment profiles – suitable for many buildings
- selectively recessed or surface-mounted bottom rail
- simple cleaning as it can easily be reached from the outside

Frame colour WT 029/90147

Perfect for balconies and loggias

weinor has many suitable solutions for anyone wishing to use his balcony or loggia in all weathers. The easily accessible multi-utility slide-and-turn partition is especially suitable.

USER-FRIENDLY SLIDE-AND-TURN PARTITION w26-c

Highlights and versions

Simply slide and turn to save space

The multi-utility slide-and-turn partition runs on only one narrow guide rail and therefore is suitable for the majority of existing balcony balustrades.

- simple handling – glass panels are simply pushed to the side or round the corner
- space saving revolving into the parking position

Side round the corner – for a totally unobscured view

You can open your all-glass elements completely when the weather is fine. This means that you do not have a view of bunched panels – but will enjoy an unobstructed view in all directions.

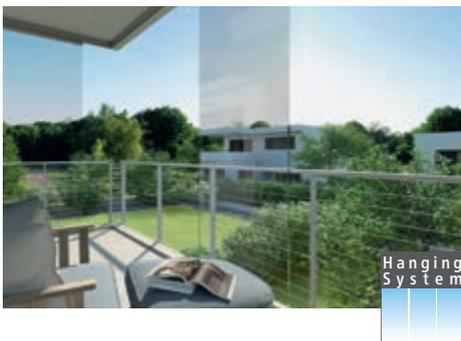

- the glass panels can be completely guided round the corners
- opening direction to the right or to the left, as you wish
- optionally also semi-opening to both sides

Turn into the parking position – for a maximum fresh air feeling

After opening, you can fold the bunched panels of the multi-utility slide-and-turn partition to the side to save space. The glass front is opened completely – for the perfect open air feeling.

- the glass panels can be guided along the wall and turned
- easily reached for optimum cleaning in the parking position

Retrofitting capacity – ideal for existing balconies and loggias

The multi-utility slide-and-turn partition is a so-called hanging system. The weight of the all-glass elements is transferred to the stable concrete ceiling.

- especially suitable for retrofitting existing balconies and loggias
- almost no load to the balcony parapet

BiConnect
Simply intuitive.

Frame colour WT 029/70786 | Pattern 3-716

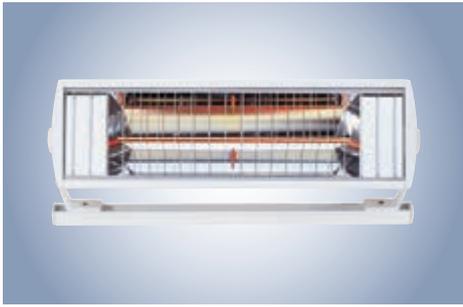

Alternatively, you can operate every element of your awning on your patio or terrace using RTS or io-homecontrol® from **somfy**.

Great comfort thanks to smart solutions

Would you like to be able to control your patio lighting, heating system or awning at the press of a button from your sun lounger? And for the awning to retract all on its own if it's windy and rainy even if you're not at home? Then BiConnect from weinor is just the right solution for you. An easy to operate hand transmitter with or without display even sends the interference-free radio signal through metal facades and thick insulating layers. And it's even possible to control them using a tablet etc. with the BiEasy app.

ACCESSORIES and CONTROL – Comfort and security

Tempura heating system – cosy warmth on cooler days

Pleasant, instant heat without any pre-heating: the energy-efficient Tempura infrared heater delivers a heat output of over 1,500 watts. Very easy to operate and control using the BiConnect radio controls.

LED/Design/3Spot light bar patio enjoyment into the evening hours

Light bars can significantly extend the time you can use your patio.

- atmospheric light thanks to special glass lenses

- highly energy-efficient
- operating life of 30,000 hours
- continuous dimming with radio control

Weather sensors – automatically react to wind and weather

They open your awning automatically when the sun comes out and can optionally retract it in the wind and rain:

- solar sensor
- sun and wind sensor (solar-powered version also available)
- sun, wind and rain sensor

47 standard RAL colours

Over 200 modern FRAME COLOURS

Colour manufacturers make every effort to guarantee colour stability. Despite this, as a result of the ban on the use of heavy metals in powder coatings, it therefore cannot be excluded that colours in general, and Fire Red (RAL 3000) in particular, may fade with time. Colours may differ significantly due to the printing process.

Maximum colour safety: weinor has over 200 different frame colours for you to choose from. You can choose from diverse colours which harmonise with the architecture.

Identical colours – for a perfect match

As weinor does all the powder coating in its own workshop, you can also rest assured that different weinor products come with the same top-class colour tonality and identical gloss level.

Choose from an abundance of high-quality colours:

- 47 standard RAL rack colours, silk gloss
- 9 scratchproof, resistant trend colours with an elegant textured look
- over 150 special RAL colours

made in Germany

Embodying innovation

Innovation plays a central role at weinor: this applies to our products, which set the highest-possible standards with their ultramodern engineering, and every element of our corporate culture alike.

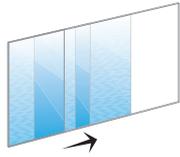

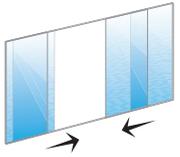

Tried and tested weinor quality

Defined work flows and manufacturing processes ensure that our products always meet the same high levels of quality. Numerous certifications also endorse this.

Ecology and responsibility

weinor is an eco-friendly company. To ensure compliance with high environmental standards, manufacturing processes and materials undergo regular testing by experts.

Important:

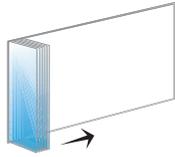

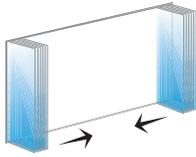

For textile sun protection: creases occur during manufacture and when folding the awning fabrics. This can lead to the areas of the fold appearing darker when seen against the light, particularly with light colours. Folds in the hem, seam and fabric

lengths occur where there are multiple layers of the woven fabric and different rolling thicknesses on the fabric roller. The resulting fabric tension can cause waviness (e.g. honeycomb or fish bone patterns). In principle, these effects occur to varying degrees in

almost all awning fabrics. Creases and folds do not detract from the value and usability of an awning. Awnings and conservatory awnings are sun protection devices which should be retracted when it is raining or windy. Wet fabric creases more easily

and as far as possible should only be retracted after drying out (please take care in strong winds and avoid pooling).
Depending on the colour of the ordered frame, we supply all small parts as well as gear handles and

drives for systems with gear drives in black (similar to RAL 9005), white (similar to RAL 9016) or grey (similar to weinor 7319).

Note for patio roofs and Glasoase*:
Ask a qualified conservatory builder about the causes of condensation formation and any cracking sounds which may occasionally be heard and how to avoid them from the planning stage onwards.
